

Rails Interview Assignment

1. Create a new Rails application
2. Create 2 models `Employee (first_name, last_name, email_address, phone, salary)` and `Department (name)`
3. Display a HTML table to list all employees and their data as below

Employees

 First Name	 Last Name	 Email	 Phone	 Salary	 Department
<u>Andrew</u>	Smith	andrew@cm.io	23670 8421	900000	Product
..

4. Add new column to this table to edit department

Employees

 First Name	 Last Name	 Email	 Phone	 Salary	 Department	 Column
<u>Andrew</u>	Smith	andrew@cm.io	23670 8421	900000	Product	Edit Department
..	Edit Department

5. `Edit Department` should open a modal that lists all available departments in a drop down. User should be able to select a department from the drop down and update the employee's department.

Andrew Smith

Department

Product ▾

Engineering

Finance

Update

6. Upload the repository in Git and share it.
